ENKI CURATES KITCHENS FOR THE MODERN HOME

Casework has revived a 20th century industrial building in Portland, USA, turning it into a collaborative co-working space for digital product agency Work & Co.

Lasts a lifetime
 In an alluring deep tone, Lundhs Emerald is one of the darkest tones in the collection and is a classic choice. "The intense colour paves a particularly intriguing character in your kitchen," say Lundhs. This surface will complement metallic accents as well as wood tones. Its qualities as a natural stone also ensure it is easy to clean and maintain, as well as being water resistant.

Emerald worktop, from £680 per sq. m, Lundhs

COVERED SILK

If you're looking for something a little bit different and quietly luxurious, take a look at Seta, a kitchen covered in a delicate silk which is encased between two thin sheets of glass and integrated within an aluminium frame. Natural stone worktops in Venus Gold are designed in horizontal and vertical sections to hide the joint details.

Fully fitted kitchens start from £60,000, Minotticucine London
