Appliance trends

A roundup of the hottest tech to hit the market

Compiled by: **George Dean**

MIELE | H2766-1 BP Oven with AirFry

With the popularity of air fryers looking to continue, Miele has developed a new oven that uses integrated air frying technology. Users of the H2766-1 BP Oven can cook meals with a new air fryer mode, which Miele says makes food crispier when compared to using the regular fan oven setting. The brand says the new product also comes with a baking sheet, universal tray, a baking and roasting rack and FlexClip telescopic runners.

WESTIN | Stratus 360

With an official launch at the year's recent kbb Birmingham show, Westin has launched its new Stratus 360 ceiling hood. The appliance uses a four-point filtration system to clean the air within a kitchen.

CAPLE | Black glass finish

Caple has introduced a new black glass finish to several of its appliance ranges, including single and double ovens, combi steam ovens, microwaves, coffee machines, warming drawers and wine cabinets. The appliance brand says that the neutral black products create a modern look, but the natural colourway means the products will complement most colour schemes and kitchen styles, including minimalist, traditional or industrial designs.

FALMEC | Gruppo Incasso Plus

Falmec has just debuted its new Gruppo Incasso Plus, an integrated cooker hood designed for installation under kitchen units. The hood comes in five alternate versions, ranging in width from

BORA | M Pure

The new Bora M Pure cooktop extractor system uses surface induction on one side, and zone induction on the other. Bora says the M Pure's two 230mm x 230mm induction zones can also be connected together to create a single 230mm x 460mm induction zone. In addition, Bora also offers replaceable air inlet nozzles in orange, red, blue, jade green, light grey, sunshine yellow and greige, which believes offers a personal touch for consumers.
